PROFILE

Final-year BSc Business and Information Technology student at Strathmore University and full-stack software engineer experienced in Laravel, Flutter, React, and Django. Founder of Nairobi Noise, a software-powered marketing agency, and CMO and Lead Developer at Catatu Logistics. Holds a Carbon and ESG Analyst certification from the University of Cambridge Online in partnership with Localized (95%), and leads TechQueens254, a 50-member girls-in-tech community in Kenya.

EDUCATION

BSc Business and Information Technology | **Strathmore University** | *Expected 2025*

Focus: Advanced Programming, Database Systems, Agile Software Development

Diploma in Business and Information Technology | **Strathmore University** | *2023*

Grade: 74% (B)

KCSE | **Moi Forces Academy Lanet** | *2022*

Overall Grade: B- | Grade A in Computer Studies

WORK EXPERIENCE

Marketing-Engineering Hybrid Lead | **Draimo AI** | *2025 – Present*

- Build and ship AI-powered product features while designing user-acquisition strategies that leverage technical capabilities
- Translate complex AI concepts into compelling narratives for end-users and investors, improving cross-team alignment

CMO and Lead Developer | **Catatu Logistics** | *2025 – Present*

- Architect and maintain the company's full-stack web platform, overseeing all technical delivery end to end
- Define and execute the marketing strategy, integrating automation tools to track campaign performance and reduce manual effort

Founder | **Nairobi Noise Marketing Agency** | *2024 – Present*

- Run a software-powered marketing agency serving SMEs across Nairobi, deploying custom automation tools, analytics dashboards, and CMS platforms for clients
- Oversee agency operations, client relationships, and a growing portfolio of brand partnerships

Software Engineer – Intern | **Strathmore University, ICT and EAS Office** | *2025 – Present*

- Engineered a Ticketing System (Laravel and Livewire) and administrative dashboard (Filament and Tailwind CSS), reducing ticket-resolution time by 30% and increasing operational efficiency by 50%
- Built a TALL-stack (Tailwind, Alpine, Laravel, Livewire) helpdesk solution with role-based access control for 10 support agents

Software Engineer – Intern | **Strathmore University, Communications Office** | *2023 – 2024*

- Designed and deployed an Equipment Management System (Laravel) serving more than 15 daily users, integrating QR-code scanning and alerts that reduced tracking errors by 40%
- Improved database performance by 25% through targeted query optimisation

Software Engineer | **ITEDA Solutions** | *2024*

- Architected an IoT-enabled Crop Dryer System (Next.js and MQTT) for real-time sensor telemetry, automating anomaly alerts and minimising crop-spoilage risk
- Deployed scalable content management (Payload CMS) to track drying cycles and inventory across multiple sites

ICT Officer – Certified Volunteer | **NEP Kenya Organisation** | *2023 – 2024*

- Built the NEP Kenya platform (React) to support health, nutrition, and WASH community interventions

- Implemented React-based workflows that streamlined sustainable-development project management and resource tracking

CERTIFICATIONS AND COURSES

- **Carbon and ESG Analyst – University of Cambridge Online in partnership with Localized** (Score: 95%)
- Generative AI – Moringa School (In Progress)
- Advanced Laravel Development
- Flutter and Dart Foundations
- Database Optimisation Techniques
- Agile Project Management
- Microsoft Azure and AWS Cloud (In Progress)

SELECTED PROJECTS

Enterprise E-Commerce Platform

Laravel, MySQL, JavaScript, Flutter

- Built a secure multi-vendor platform with a Flutter admin dashboard, integrated payment gateway, fraud detection, and modular API architecture

TrendyTwice – Social Commerce App

Flutter, Firebase, Laravel API (In Progress)

- Developing a fashion-resale mobile app with social feeds, listing management, and sustainability-focused analytics

Community Outreach Portal

Django, React, JavaScript

- Created real-time data-visualisation tools to measure community impact; reporting features secured a 30% increase in funding for partner NGOs

TECHNICAL SKILLS

Languages: PHP (Laravel), Dart (Flutter), Python (Django), JavaScript, SQL, C++, Java

Frameworks: Laravel, Flutter, React, Django, Next.js, Livewire, Filament, Tailwind CSS

Databases: MySQL, PostgreSQL, Firebase

Tools and Cloud: Git, Docker, RESTful APIs, MQTT, CI/CD, GCP, Azure, AWS (In Progress)

Marketing Tech: Campaign automation, analytics dashboards, CMS platforms, SEO tools

Sustainability: Carbon accounting, ESG analysis and reporting, SDG framework, carbon footprint measurement, sustainability data interpretation (University of Cambridge Online × Localized, 95%)

Languages Spoken: English (fluent), Swahili (native)

LEADERSHIP AND COMMUNITY

- Founder and Community Lead, TechQueens254 – 50-member girls-in-tech community running monthly hackathons and mentorship programmes across Kenya
- Project Lead, Student Council Senate, Strathmore University – delivered technology initiatives on time and within budget
- Coding Mentor – teaches programming to underprivileged youth in Nairobi

INTERESTS

Open-source contribution, sustainable technology, community-led innovation, fashion-tech, and distance running.
